

 **FinPan**  
presents **ProPanel™**  
**A NEW KIND OF BACKER BOARD**

There is a long-standing belief that if something is new and easier to use, there must be a catch. But is that really the case? We decided to test this belief by creating a new kind of backer board, **ProPanel™ Lightweight Waterproof Backer Board**.

First we made **ProPanel™ Backer Board** lighter, around 6 lbs. per ¼" and ½" 3'x5' board. We met industry standards for residential and light commercial applications.

Then, we ensured that it was easier to handle and install. **ProPanel™ Backer Board** cuts easily and cleanly with a utility knife.

We didn't stop there; we created a waterproof board by using the latest in polymer coating technology. **ProPanel™ Backer Board** passed the demanding Hydrostatic Water Pressure Test.

Finally, we backed **ProPanel™ Backer Board** with an industry leading 35-Year Limited Warranty\* and priced it far below what you may pay for other lightweight, waterproof boards.

We encourage you to form your own opinion on **ProPanel™ Backer Board**. The only catch we could find... you'll spend less time on your jobs and your back will thank you for it!
